

Designer ECY1_2 Migration Tool 1.0.0

Quick Start Guide

Purpose

- Load Designer package ZIP files
- Locate embedded .dg5 files
- Extract data point paths
- Discover BACnet objects from an ECLYPSE controller
- Automatically match replacement paths
- Save updated .dg5 migration files

Step 1 – Launch the Tool

- Run the PowerShell script or right-click the .ps1 file and select Run with PowerShell.

Step 2 – Load a Designer Package

- Click Browse and select the Designer package ZIP file.

Step 3 – Extract and List DG5 Files

- Click Extract & List .dg5 to scan the ZIP and populate the file list.

Step 4 – Open a DG5 File

- Double-click a row or use Preview File from the context menu.

Step 5 – View Data Points

- Click Data Points to display extracted /Data paths.

Step 6 – Configure Controller Connection

- Enter Host/IP, Username, Password, and Timeout values.

Step 7 – Test Connectivity

- Click Test Connection and verify connectivity to the target controller.

Step 8 – Discover BACnet Objects

- Click Auto-Fill Replacements to discover BACnet objects and populate replacement paths.

Step 9 – Review Matches

- Review and validate all generated replacement paths.

Step 10 – Show Discovered Objects

- Optional: Use Show Discovered Objects to inspect discovered BACnet paths.

Step 11 – Apply Replacements

- Click Apply Replacements & Save to perform path substitutions.

Step 12 – Save the Updated File

- Save the modified .dg5 file to a new location.

Common Workflow

- Browse ZIP → Extract .dg5 → Open DG5 → View Data Points → Test Connection → Auto-Fill Replacements → Review Matches → Apply Replacements & Save

Best Practices

- Keep backups of the original package.
- Validate all automatic matches.
- Test in a staging environment before production deployment.
- Use Show Discovered Objects to verify mappings.

Notes

- The original ZIP package is not modified.
- Modified files are saved separately.
- SSL certificate validation is bypassed for controller communication.
- Review all replacements before deployment.
